Product Description

Uniflo Sainless Steel Baby Oil finisher 10Ltr For use on all Stainless Steel appliances, ie Kitchen appliances, Stainless Steel Urinals. Cleans and shines. Instructions for use: You will need two dry, lint free soft cloths, microfiber cloths are ideal. Firstly, clean your appliance with a soft, wet cloth. For tough grime use a stainless steel cleaner. Don't worry about any watermarks left behind the oil will take care of them. Apply the cleaning oil with one of the soft dry lint free cloths, wipe the oil in the direction of the grain of the stainless steel. Look closely and you will see that there are lots of tiny grain lines all going in the same direction, wipe parallel to the lines and not perpendicular to them, otherwise you risk scratching the surface. Use the other dry lint free cloth to softly buff up the oil using very little pressure, this should buff to a sparkling shine. The oil will clean and shine the surface. Care should be taken when using all types of cleaning agents.
